

Latest Environmental Committee Brochure: NonPoint Source Pollution

Filled with information, with an eye-catching design, our long-planned NonPoint Source Pollution brochure is now a reality, thanks to our very talented Environmental Committee member, Tai Stills, who designed and led the production of this new brochure! The SLV Water District provided funding for the production and first 5,000 copies through their Education Grant Program, for which we are very grateful! Copies have been mailed to local businesses and made available through businesses, churches and libraries. We are seeking funding for additional copies so they can be mailed to each resident in the SLV! Call for more copies (338-1728).
