

MEMO

TO: District Manager

FROM: Finance Manager

DATE: April 9, 2010

SUBJECT: WATER CONSERVATION CREDIT PROGRAMS STATUS REPORT
JANUARY 1, 2010 – MARCH 31, 2010

RECOMMENDATION:

It is recommended that the Board of Directors review and file this memo regarding the Water Conservation Credit Programs for the period January 1, 2010 through March 31, 2010.

BACKGROUND:

At the September 3, 2009 Board of Director's meeting, your Board approved Resolution No. 7 (09-10) which implemented Water Conservation Credit Programs (to be effective September 15, 2009) for the following:

- 1) A rebate credit, applied to the customer's water bill, of actual purchase price not to exceed a maximum of \$150.00 per fixture, for the replacement of an existing conventional high-volume toilet (3.5+ gpf) with a high-efficiency toilet (HET) (1.28 gpf).
- 2) A rebate credit, applied to the customer's water bill, of actual purchase price not to exceed a maximum of \$100.00 per appliance, for the purchase and installation of a high-efficiency clothes washer (HECW).
- 3) A rebate credit, applied to the customer's water bill, of actual purchase price not to exceed \$20.00 per 100 sq. ft., and not to exceed \$500.00 per customer, for the purchase and replacement of an existing spray irrigation system with an appropriately installed drip irrigation system (DRIP).
- 4) A rebate credit, applied to the customer's water bill, of actual purchase price not to exceed \$1.50 per square foot, and not to exceed \$750.00 per customer for replacement of an existing lawn with synthetic turf or low-water use grass (LAWN).
- 5) A rebate credit, applied to the customer's water bill, of actual purchase price, not to exceed \$75.00 per customer for a Weather-Based Irrigation Controller without an associated signal fee (WBIC).
- 6) A rebate credit, applied to the customer's water bill, of actual purchase price, not to exceed \$125.00 per customer for a Weather-Based Irrigation Controller with an associated signal fee (WBIC).

During the period January 1, 2010 through March 31, 2010, District staff has processed 34 rebate credits for the purchase and installation of high-efficiency toilets in the amount of \$4,860.00, 35 rebate credits for the purchase and installation of high-efficiency clothes washers in the amount of \$3,500.00. 257 rebate credits in the amount of \$31,226.21 have been processed to date for Fiscal Year 2009/2010 (71 HET in the amount of \$10,310.00, 119 HECW in the amount of \$11,900.00, 4 LAWN in the amount of \$2,826.00 and 63 ULFT in the amount of \$6,190.21). The total budget approved for Fiscal Year 2009/2010 is \$45,000.00.

Estimated water savings associated with the Water Conservation Credit Program are based upon the following:

- High Efficiency Washing Machines assume average estimated annual savings of 5,100 gallons/year per replacement of a low-efficiency clothes washer with a high-efficiency washer.
- Replacement of 3.5 gpf toilets with high-efficiency toilets of 1.28 gpf or less is estimated to result in savings of approximately 10 gallons of water per day for each toilet.
- Lawn replacement with synthetic turf saves approximately 17 gallons of water per square foot per year.
- Conversion of spray to drip irrigation system is estimated to save approximately 4,500 gallons of water per year for a 500 square foot landscape.
- Installation of a weather based irrigation controller is estimated to result in a 20% average reduction in landscape water.

It is recommended that the Board of Directors review and file this memo regarding the Water Conservation Credit Programs for the period January 1, 2010 through March 31, 2010.
