Description: The San Lorenzo Valley Water District (SLVWD) is an independent special district supplying water to approximately 22,500 people on the Central Coast. SLVWD utilizes both surface water and ground water sources. SLVWD also owns and operates a wastewater treatment facility, serving 56 houses.

Primary Calculation Methodologies: SLV Water District used equations in the GRP 3, Rev. 1 which accounts for special emission factors for P G & E, and default factors in CARROT to report and inventory our 2008 GHG emissions.

Organizational structure disclosure: The San Lorenzo Valley Water District is a government agency.

* HFCs and PFCs are classes of greenhouse gases that include many compounds. These columns may reflect the total emissions of multiple HFC and PFC compounds, each of which has a unique Global Warming Potential (GWP). Emissions of each gas are first multiplied by their respective GWP and then summed in the total CO2-equivalent column.

VERIFICATION INFORMATION

Verification Body: E.H. Pechan & Associates, Inc.

Basis of Verification Opinion: Pechan will verify that SLVWD has had its annual GHG emissions report covering the period January 1, 2008 to December 31, 2008 verified according to the California Climate Action Registry's GRP Verification Protocol version 3.1 and Local Government Operations Protocol version 1.0. Pechan identified no material misstatements in SLVWD's CY2008 GHG reporting to the Registry, discussed above. Pechan did not identify any other reporting issues that would cause non-compliance with GRP version 3.1 and Local Government Operations Protocol version 1.0.

OPTIONAL INFORMATION

Information in this section is voluntarily provided by the participant for public information, but is not required and thus, not verified under California Registry protocols.

Optional Emissions	CO2e	CO2	CH4	N2O	HFCs*	PFCs*	SF6	Unit
Employee Commuting and Business Travel	35.72	35.42	0.00	0.00	0.00	0.00	0.00	metric ton
TOTAL OPTIONAL	35.72	35.42	0.00	0.00	0.00	0.00	0.00	metric ton

Emissions Efficiency metric:

Emissions Management Programs:

Emissions Reduction Projects:

The District participates in several water conservation projects to encourage its customers to conserve water; thereby conserving energy. The District is investigating water recharge projects to increase groundwater storage to better conserve energy from groundwater pumping. The District is also investigating solar power to use at various installations.

Emissions Reduction Goals:

The District's Board adopted a resolution in 2008 to adopt a policy matching AB 32 GHG emission reduction goals.
