

TABLE OF CONTENTS

EXECUTIVE SUMMARY.....ix

LIST OF FIGURES.....xv

LIST OF TABLES.....xviii

ACKNOWLEDGMENTS.....xx

CHAPTER 1: INTRODUCTION.....1-1

1.0 Introduction and purpose.....1-1

1.1. Background.....1-1

1.2 The District’s partnerships in watershed protection.....1-2

1.3 Scope of document.....1-3

1.4 How to use this document.....1-4

 Part I: Existing conditions.....1-4

 Part II: District goals, objectives, and management strategies.....1-4

CHAPTER 2: OVERVIEW OF DISTRICT LANDS & WATER SUPPLY.....2-1

2.1 Regional setting: The Santa Cruz Mountains.....2-1

2.2 The San Lorenzo River watershed.....2-2

 2.2.1 Topography.....2-2

 2.2.2 Climate.....2-2

 2.2.3 Biodiversity.....2-2

 2.2.4 Geology and soils.....2-3

 2.2.5 Human uses in the San Lorenzo River watershed.....2-3

 2.2.5.a Development.....2-3

 2.2.5.b Timber.....2-4

 2.2.5.c Mining.....2-5

 2.2.5.d Water extraction.....2-6

 2.2.5.e Farming and ranching.....2-7

 2.2.5.f Recreation and tourism.....2-7

 2.2.5.g Open space.....2-8

2.3 Overview of the District’s land, water supply, and distribution system.....2-10

 2.3.1 District watershed lands.....2-10

 2.3.1.a Foreman Creek.....2-11

 2.3.1.b Peavine Creek.....2-12

 2.3.1.c Silver Creek.....2-13

 2.3.1.d Clear Creek.....2-13

 2.3.1.e Sweetwater Creek.....2-13

 2.3.1.f Fall Creek.....2-14

 2.3.1.g Zayante Creek.....2-14

 2.3.2 District water supply from surface diversions.....2-14

 2.3.3 District wells and groundwater recharge lands.....2-17

 2.3.3.a The Olympia wellfield.....2-17

 2.3.3.b Quail Hollow wells.....2-20

 2.3.3.c Pasatiempo wells.....2-22

 2.3.3.d Mañana Woods well.....2-24

CHAPTER 3: HYDROLOGY, GEOMORPHOLOGY & WATER QUALITY.....3-1

3.0 Introduction.....3-1

3.1 Overview of landscape evolution.....3-1

3.1.1 Geologic formation of the Santa Cruz Mountains.....3-1

3.1.2 Geologic formation of the San Lorenzo River watershed.....3-2

3.1.3 Human impacts from land use changes.....3-2

3.2 Hydrologic processes.....3-3

3.2.1 Precipitation in the San Lorenzo River watershed.....3-3

3.2.2 Streamflow in the San Lorenzo River watershed.....3-6

3.2.3 Precipitation and streamflow in District water supply streams.....3-10

3.2.4 Groundwater pumping and streamflow in the San Lorenzo River watershed.....3-10

3.2.5 District groundwater storage and recharge.....3-11

3.2.5.a The northern service area.....3-11

3.2.5.b The southern service area.....3-16

3.2.5.c Mañana Woods.....3-17

3.3 Soils, geology, and hillslope geomorphology.....3-18

3.3.1 Soils.....3-18

3.3.1.a Soil diversity in the San Lorenzo River watershed.....3-19

3.3.1.b High-cadmium soils.....3-21

3.3.2 Geologic areas and soil types of the San Lorenzo River watershed.....3-22

3.3.2.a Area 1: Ben Lomond Mountain geologic unit.....3-23

3.3.2.b Area 2: East of the Ben Lomond Fault and south of the Zayante Fault.....3-26

3.3.2.c Area 3: North of the Zayante Fault.....3-26

3.3.3 Hillslope geomorphology.....3-29

3.3.3.a Soil erosion.....3-29

3.3.3.b Erosion potential.....3-30

3.3.3.c Channel conditions.....3-32

3.3.3.d Sediment transport.....3-32

3.3.3.e Bed sedimentation.....3-35

3.3.3.f Sedimentation trends.....3-36

3.3.3.g Upland sediment sources.....3-38

3.3.3.h Bank erosion.....3-38

3.4 Natural disturbances in the San Lorenzo River watershed.....3-40

3.4.1 Storms and floods.....3-40

3.4.2 Wind.....3-41

3.4.3 Landslides and mass-wasting.....3-41

3.4.4 Earthquakes.....3-43

3.4.5 Fire.....3-43

3.5 Human-induced disturbances in the San Lorenzo River watershed.....3-44

3.5.1 Mass Wasting / Landslides.....3-46

3.5.2 Roads.....3-47

3.5.2.a Unpaved roads.....3-48

3.5.2.b Continuous use of roads through the rainy season.....3-48

3.5.2.c Road slipouts and roadcut failures.....3-48

3.5.2.d Undersized or faulty culverts and drains.....3-48

3.5.2.e Change in use from timber harvest to residential and recreational use.....3-49

3.5.2.f Failure to maintain logging roads.....3-49

3.5.2.g Poor road construction practices.....3-49

3.5.3 Logging.....3-50

3.5.3.a Legacy impacts.....3-50

3.5.3.b Cumulative impacts.....3-51

3.5.4 Rural and urban development.....3-52

San Lorenzo Valley Water District Watershed Management Plan, Final Version
Part I: Existing Conditions Report

3.5.5 Agriculture.....	3-54
3.5.6 Livestock and equestrian uses.....	3-54
3.5.7 Mining.....	3-54
3.6 Human-induced disturbances on District watershed lands.....	3-55
3.7 District water quality.....	3-56
3.7.1 Source water protection and drinking water treatment.....	3-56
3.7.1.a District source water protection zones.....	3-56
3.7.1.b Maximum contaminant levels.....	3-58
3.7.2 Surface water quality.....	3-59
3.7.2.a Sediment and turbidity.....	3-59
3.7.2.b Nitrates.....	3-59
3.7.2.c Pathogens.....	3-62
3.7.2.d Toxic compounds.....	3-64
3.7.3 Groundwater quality.....	3-67
3.7.3.a Natural impacts to groundwater quality.....	3-67
3.7.3.b Human impacts to ground water quality.....	3-68
3.7.4 The connection between surface water, ground water, and water quality.....	3-69
CHAPTER 4: BIOTIC RESOURCES.....	4-1
4.0 Introduction.....	4-1
4.1 Biodiversity at regional and watershed scales.....	4-1
4.1.1 The role of natural disturbance in biodiversity.....	4-1
4.1.2 The role of recent human disturbance.....	4-2
4.2 Major plant communities of the region, the watershed, and District lands.....	4-2
4.2.1 Redwood and mixed-redwood forests.....	4-2
4.2.1.a Habitat and range.....	4-2
4.2.1.b Attributes.....	4-3
4.2.1.c Redwood and mixed redwood forest of the San Lorenzo River watershed.....	4-3
4.2.1.d Redwood and mixed redwood forest on District land.....	4-4
4.2.2 Black oak woodland plant communities.....	4-6
4.2.3 Mixed evergreen forest plant communities.....	4-6
4.2.3.a Sudden oak death.....	4-7
4.2.4 Chaparral plant communities.....	4-8
4.2.5 Plant communities of the Santa Cruz sandhills.....	4-8
4.2.5.a Sand chaparral.....	4-9
4.2.5.b Sand parkland.....	4-9
4.2.5.c Habitat.....	4-9
4.2.5.d Range.....	4-9
4.2.5.e Special status plant species of the sandhills.....	4-11
4.2.5.f Loss of sand chaparral and sand parkland communities.....	4-12
4.2.6 Riparian woodland plant communities.....	4-12
4.2.6.a Riparian woodland in the San Lorenzo River watershed.....	4-12
4.2.6.b Riparian woodland on District-owned land.....	4-12
4.2.7 Grassland plant communities.....	4-14
4.2.8 Other endemic, rare, and endangered plant species of the region.....	4-14
4.3 Wildlife species of the region, the watershed, and District lands.....	4-16
4.3.1 Wildlife species of redwood and mixed redwood forest communities.....	4-16
4.3.2 Wildlife species of old-growth and late-successional redwood forest communities.....	4-17
4.3.3 Wildlife species of riparian plant communities.....	4-20
4.3.4 Wildlife species of chaparral plant communities.....	4-21
4.3.5 Wildlife habitat and species of the Santa Cruz sandhills.....	4-21

San Lorenzo Valley Water District Watershed Management Plan, Final Version
Part I: Existing Conditions Report

4.4 Aquatic habitat and fisheries of the region, the watershed, and District lands.....	4-24
4.4.1 Characteristics of a healthy stream.....	4-25
4.4.2 The food web in aquatic ecosystems.....	4-26
4.4.3 Large instream wood as a component of aquatic habitat.....	4-27
4.4.4 Distribution of large instream wood.....	4-30
4.4.5 Salmonids and other native fishes in the San Lorenzo River watershed.....	4-33
4.4.6 Life history of native salmonids.....	4-33
4.4.7 Monitoring of salmonids in the San Lorenzo River.....	4-34
4.4.8 Salmonids on District-owned land.....	4-34
4.4.9 Decline of salmonids on the Central Coast.....	4-36
4.4.10 Decline of salmonids within the San Lorenzo River watershed.....	4-36
4.4.10.a Decline of coho.....	4-36
4.4.10.b Decline of steelhead.....	4-37
4.4.10.c Requirements for salmonid rearing habitat.....	4-37
4.4.10.d Limiting factors for local salmonids.....	4-38
4.4.11 Reptiles and amphibians.....	4-39
4.5 Ecosystem functions and natural services.....	4-41
4.5.1 Ecosystem functions of old-growth and late successional forests.....	4-42
4.5.1.a Ecosystem functions of forest soils.....	4-42
4.5.1.b Ecosystem functions of snags.....	4-43
4.5.1.c Ecosystem functions of downed logs.....	4-44
4.5.2 Ecosystem functions of the riparian zone.....	4-45
4.5.2.a Nutrient distribution and flooding.....	4-46
4.5.2.b Hydrologic function.....	4-47
4.5.2.c Water quality enhancement.....	4-47
4.5.2.d The riparian zone in the San Lorenzo River watershed.....	4-48
4.6 Human impacts to biotic resources.....	4-49
4.6.1 Development.....	4-50
4.6.2 Roads.....	4-50
4.6.3 Logging.....	4-51
4.6.3.a Habitat degradation from logging.....	4-51
4.6.3.b Loss of large instream wood after logging.....	4-55
4.6.4 Water diversions and pumping.....	4-55
4.6.4.a Water diversions.....	4-55
4.6.4.b Groundwater pumping.....	4-56
4.6.5 Mining and quarries.....	4-56
4.6.6 Recreational use.....	4-57
4.6.7 Chemicals and pesticides.....	4-58
4.6.8 Exotic species.....	4-58
4.6.8.a Exotic mammals.....	4-59
4.6.8.b Exotic aquatic animal species.....	4-59
4.6.8.c Exotic invasive plants.....	4-59
CHAPTER 5: FIRE MANAGEMENT.....	5-1
5.0 Introduction.....	5-1
5.1 Historical fire regimes in the Monterey Bay Area.....	5-2
5.1.2 Lightning Regime.....	5-3
5.1.3 Aboriginal Regime.....	5-3
5.1.4 Spanish Mexican Regime.....	5-3
5.1.5 Anglo Regime.....	5-3
5.1.6 Recent Regime.....	5-4
5.2 Fire in the San Lorenzo River watershed.....	5-6

San Lorenzo Valley Water District Watershed Management Plan, Final Version
Part I: Existing Conditions Report

5.3 Potential impacts to water resources from wildfire.....	5-6
5.3.1 Expected aftermath of a high intensity fire at the watershed scale.....	5-6
5.3.1.a Alteration of surface hydrology and sedimentation.....	5-7
5.3.1.b Chemical impacts to water quality from fire retardants.....	5-7
5.3.1.c Habitat degradation and loss.....	5-7
5.3.2 Expected aftermath of a high intensity fire on District-owned lands.....	5-8
5.4 Fire management jurisdictions and practices.....	5-8
5.5 Forest management and fire in the Santa Cruz Mountains.....	5-9
5.5.1 Forest management and fire in the San Lorenzo River watershed.....	5-11
5.5.2 Forest management and fire on District lands.....	5-11
5.6 Assessing fire hazard and risk.....	5-12
5.6.1 Sources of ignition.....	5-12
5.6.2 Weather conditions leading to increased fire hazard.....	5-15
5.6.3 Increased hazard from Sudden Oak Death and invasive species.....	5-16
5.7 Water utility fire management plans.....	5-16
5.8 Modeling fire.....	5-16
CHAPTER 6: CULTURAL, HISTORICAL, RECREATIONAL & EDUCATIONAL RESOURCES.....	6-1
6.0 Introduction.....	6-1
6.1 Cultural and historical resources in the San Lorenzo River watershed.....	6-1
6.1.1 Ohlone history and archeology.....	6-1
6.1.2 Land-use history of the watershed.....	6-2
6.1.2.a Landmarks of past of logging.....	6-2
6.1.2.b Landmarks of past mining.....	6-2
6.1.3 History of the District and District-owned lands.....	6-4
6.2 Recreational resources.....	6-7
6.2.1 History of tourism and recreation in the San Lorenzo River watershed.....	6-7
6.2.2 Present day tourism and recreational opportunities in the watershed.....	6-8
6.2.2.a State Parks.....	6-8
6.2.2.b County Parks.....	6-9
6.2.2.c City parks.....	6-9
6.2.3 Recreation outside of the park system.....	6-9
6.2.4 Recreation on District-owned lands.....	6-10
6.2.4.a Trespass and its impacts on rare habitat.....	6-10
6.2.4.b Potential benefits of limited recreational uses.....	6-11
6.2.4.c Liability.....	6-11
6.3 Educational resources.....	6-11
6.3.1 Educational resources in the San Lorenzo River watershed.....	6-11
6.3.1.a The Santa Cruz County Public Libraries.....	6-12
6.3.1.b The Boulder Creek Historical Society.....	6-12
6.3.1.c Roaring Camp Railroad.....	6-12
6.3.1.d The Santa Cruz County Science Fair program.....	6-12
6.3.1.e The California Regional Environmental Education Community (CREEC).....	6-12
6.3.1.f San Lorenzo Valley High School Watershed Academy.....	6-12
6.3.1.g Monterey Bay Salmon and Trout Project.....	6-12
6.3.1.h The California Native Plant Society (CNPS).....	6-13
6.3.1.i Santa Cruz County Resource Conservation District.....	6-13
6.3.1.j Valley Women’s Club.....	6-13
6.3.1.k “Our Water Works in Santa Cruz County”.....	6-13

San Lorenzo Valley Water District Watershed Management Plan, Final Version
Part I: Existing Conditions Report

6.3.1.1 Sandhills Alliance for Natural Diversity (SAND)	6-14
6.3.1.m The District’s Education Grant Program.....	6-14
6.3.2 Educational resources on District-owned lands.....	6-14

CHAPTER 7: LOCAL CLIMATE CHANGE ASSESSMENT

7.0 Introduction.....	7-1
7.1 Overview of the evidence for global climate change.....	7-1
7.1.2 The greenhouse effect.....	7-1
7.1.3 Observed long-term changes.....	7-1
7.1.4 Abrupt climate change.....	7-2
7.1.5 The carbon cycle.....	7-3
7.1.6 Restoring balance to the carbon cycle.....	7-4
7.2 The two aspects of climate change: Mitigation and adaptation.....	7-5
7.2.1 District planning to date for climate change mitigation and adaptation.....	7-5
7.3 General projections of global climate change.....	7-6
7.4 General projections of climate change for California.....	7-6
7.5 Approaches of assessing climate change at the local scale.....	7-7
7.5.1 Downscaling from global climate models.....	7-7
7.5.2 Using localized hydrologic models.....	7-7
7.6 Adaptation: Climate change and water resource management.....	7-8
7.7 Adaptation: Using climate change models to predict local vulnerabilities.....	7-8
7.8 Adaptation: Preparing for historic local extreme climate events.....	7-9
7.9 Forests, climate change, and carbon sequestration.....	7-10
7.9.1 Forests as carbon sinks.....	7-10
7.10 The California Climate Registry and carbon credits for forestland owners.....	7-13
7.10.1 The Climate Registry.....	7-14
7.10.2 CCAR Forest Protocols.....	7-14
7.10.3 Carbon credits for forest landowners conserving forests.....	7-15
7.10.4 The District’s forestland, carbon sequestration, and potential carbon credits.....	7-16

APPENDIX A: FISHERIES.....A-1

A.0 Introduction.....	A-1
A.0.1 Native fishes.....	A-2
A.0.2 Native estuarine fish species.....	A-10
A.0.3 Non-native fishes.....	A-10
A.1 Life cycles and habitat requirements of salmonids.....	A-10
A.1.1 Spawning habitat requirements.....	A-12
A.1.2 YOY and smolt habitat requirements.....	A-12
A.1.3 General habitat requirements for salmonids.....	A-13
A.1.4 Natural history of steelhead.....	A-13
A.1.4.a Life span and survival rates.....	A-13
A.1.4.b Spawning.....	A-14
A.1.4.c Egg incubation and fry emergence.....	A-15
A.1.4.d Juveniles.....	A-15
A.1.4.e Importance of juvenile size classes.....	A-16
A.1.4.f Juvenile habitat requirements.....	A-17

San Lorenzo Valley Water District Watershed Management Plan, Final Version
Part I: Existing Conditions Report

A.1.4.g Smolts.....	A-19
A.1.5 Natural history of coho salmon.....	A-20
A.1.5.a Spawning.....	A-20
A.1.5.b Incubation and emergence.....	A-22
A.1.6 Juvenile coho.....	A-22
A.1.7 Coho smolts.....	A-22
A.2 Ecological role of salmonids.....	A-23
A.3 Decline of salmonids throughout their range.....	A-23
A.3.1 Decline of coho.....	A-23
A.3.2 Decline of steelhead.....	A-25
A.4 Decline of salmonids within the San Lorenzo River watershed.....	A-27
A.4.1 Decline of steelhead in the watershed.....	A-27
A.4.2 Decline of coho in the watershed.....	A-28
A.4.3 Habitat conditions 1950-1975.....	A-28
A.4.5 Recent habitat conditions.....	A-29
A.5 Aquatic habitat typing.....	A-31
A.5.1 Local stream reaches.....	A-33
A.5.1.a Upper mainstem.....	A-33
A.5.1.b The middle mainstem.....	A-35
A.5.1.c The lower mainstem.....	A-36
A.5.1.d Tributaries.....	A-37
A.6 Limiting factors to steelhead survival in the San Lorenzo River.....	A-40
A.6.1 Streambed sedimentation.....	A-42
A.6.2 Decreased stream flow.....	A-43
A.6.2.a Municipal water extraction and well-pumping.....	A-45
A.6.2.b Stream flow & steelhead densities in the San Lorenzo River.....	A-46
A.6.3 Absence of large instream wood.....	A-53
A.6.4 Barriers to anadromy.....	A-54
A.6.4.a Types of passage barriers.....	A-54
A.6.4.b Location of passage barriers.....	A-56
A.6.4.c Effect of streamflows on passage barriers.....	A-53
A.6.5 Poor water quality.....	A-60
A.6.5.a Water temperature.....	A-59
A.6.5.b Dissolved oxygen.....	A-62
A.6.6 Other potentially limiting factors to salmonids.....	A-62
A.6.6.a Hatchery fish planting.....	A-62
A.6.6.b Pinniped predation (seals and sea-lions).....	A-64
A.6.6.c Freshwater sport fishing.....	A-65
A.7 Quantitative assessment of juvenile steelhead & coho salmon populations in the San Lorenzo River.....	A-66
A.7.1 Overall mainstem trend in smolt-sized juveniles, 1994-2001.....	A-67
A.7.2 Overall watershed trend in smolt-sized juveniles, 1998-2001.....	A-68
A.7.3 Overall mainstem trend in total number of juveniles, 1996-2001.....	A-68
A.7.4 Overall tributary trend in yearling (smolt-sized) juveniles, 1998-2001.....	A-70
A.7.5 Trends in smolt-sized juveniles in the middle and upper mainstem and four upper tributaries, 1998-2005.....	A-70
A.7.6 Trends in index of adult returns.....	A-72
A.8 Comparison of fish sampling methods.....	A-74
A.9 Recovery efforts for coho salmon and steelhead.....	A-76

**APPENDIX B: HISTORY OF LOGGING REGULATION
IN SANTA CRUZ COUNTY..... B-1**

LITERATURE CITED.....L-1
