Public Water System Contact
Mailing Address
City, CA Zip code

Dear Water Purveyor:

Pursuant to Water Code Section 13272.1, we are transmitting the enclosed report to all public water system operators within the Central Coast Region. The report lists detections of MTBE (methyl tertiary-butyl ether) in groundwater at underground storage tank (UST) sites reported to this Board during the period October 1, 2005, to March 31, 2006, and supplements previous MTBE reports. The report, which is organized by county, includes the name and address of the site. The column entitled "MTBE Detection" contains the date of the reported detection of MTBE. The column entitled "MTBE conc. (ppb)" contains the maximum concentration (in parts per billion) of MTBE detected in groundwater on that corresponding date.

Please review the enclosed list carefully and compare the distance between your supply wells and water intakes to the UST sites. Also, review the attached graph titled "Investigation Priority Class (A, B, or C)" to determine whether any of these sites fall within the area indicated as "A" on this graph. For example, if you find a UST site 1000 feet from your well and the concentration reported is 1000 ppb (read across bottom of graph) it would fall within Priority Class "A". If you have not already done so, please advise the Regional Board staff person assigned to your area as indicated on the attached list.

The general public is no longer able to see public water supply well locations over the internet. However, you may view them from a secure **GeoTracker** website at <https://geotracker.waterboards.ca.gov/well%5Faccess/>, which requires password access. If you have not already done so, submit your request for obtaining a password online at the web address mentioned above and then a State Water Resources Control Board agent will contact you with your password information. We encourage you to verify the location of your water supply wells on the secure GeoTracker website. Should a public well appear to be inaccurately located, GeoTracker will allow water system operators, from the secure website, to re-position their respective wells to their true locations.

As a final note, considering the threat posed by releases at operating gasoline service stations, we suggest imposing well protection zones by local authorities. Local permitting agencies should be contacted to implement this option.

We update MTBE data as we receive MTBE information. On a quarterly basis, we will send you an updated list of the latest reported MTBE detection dates and maximum MTBE concentrations in groundwater. For more information regarding sites on the enclosed report, please telephone the staff person assigned to your area.

Sincerely,

Roger W. Briggs
Executive Officer

Enclosure: MTBE Report to Public Water System Operators, 10/1/05 to 3/31/06

* Data from the State Water Resources Control Board Geotracker data base.

** Most recent date MTBE (methyl tertiary butyl ether) has been detected.

*** Maximum concentration of MTBE detected in any wells on the corresponding date. MTBE concentrations are given in parts per billion (ppb). Concentrations shown as <# signify the detection limit in ppb.
