

M E M O

TO: District Manager

FROM: Director of Operations

SUBJECT: Operations Department Project Status Report
Week Ending January 13, 2006

DATE: January 13, 2006

RECOMMENDATION:

It is recommended that the District Manager review and file the Operations Department Project Status Report for the week ending January 13, 2006.

BACKGROUND:

New Water Service

During the reporting period staff install a new water service off Dry Well Road in Boulder Creek. The new service is supplying a combination domestic/fire flow to a new single family dwelling.

University Tank Demolition

Staff removed the wooden University Tank that was taken off line due to non-repairable water leaks in the tank. The bottom of the tank rotted beyond repairs. Staff removed the tank and cleaned the site for replacement considerations.

Intake Cleaning/shutdown

During the reporting period staff removed intakes from use on the Five Mile Pipeline. Foreman Creek is supplying the District's needs for surface water. These intakes are taken off line each winter because of the restricted winter access.

Rick Rogers
