

Project: Glen Arbor Bridge Pipeline Replacement Project

Location: Ben Lomond, at Glen Arbor Road

Background: The District water main inside Glen Arbor Road is both undersized and leaking. Additionally, the pipe is inaccessible and maintenance cannot be performed

Project Description: This project includes the design and construction of an 8-inch ductile iron water main to extend across the Glen Arbor Bridge. In addition to being larger than the current pipe, the new pipe will be designed to be easily observed and repaired when needed.

Estimated Bid Amount: Still in Design Phase
