

Project: Lompico PRV Replacement Project

Location: Lompico, primarily around Lake Blvd and Visatar Street.

Background: Six pressure reducing valves (PRVs) were aging and not functioning properly

Project Description: Project included traffic control, roadwork, removal of existing PRV's, and installation/connection of new PRV assemblies including precast vault boxes, ladders, access hatches, piping, and drainage. Pressure testing and disinfection was performed before final backfill and surface grading work.

Bid Amount: \$468,000

Date of Completion: Project has been completed Feb 2020.
