

Project: Swim Tank Replacement Project

Location: Ben Lomond, at Country Club Drive

Background: This site is currently home to two older redwood tanks, which recently have begun leaking.

Project Description: A replacement bolted steel water storage tank, with a much larger capacity and reinforced concrete ring foundation, will be constructed to take the place of the older redwood storage tanks. Project also includes installation of new pipelines, a new pump station, and site work such as fencing and road repair.

Estimated Bid Amount: To Be Determined.
