

# Capital Improvement and CZU Fire Recovery Projects

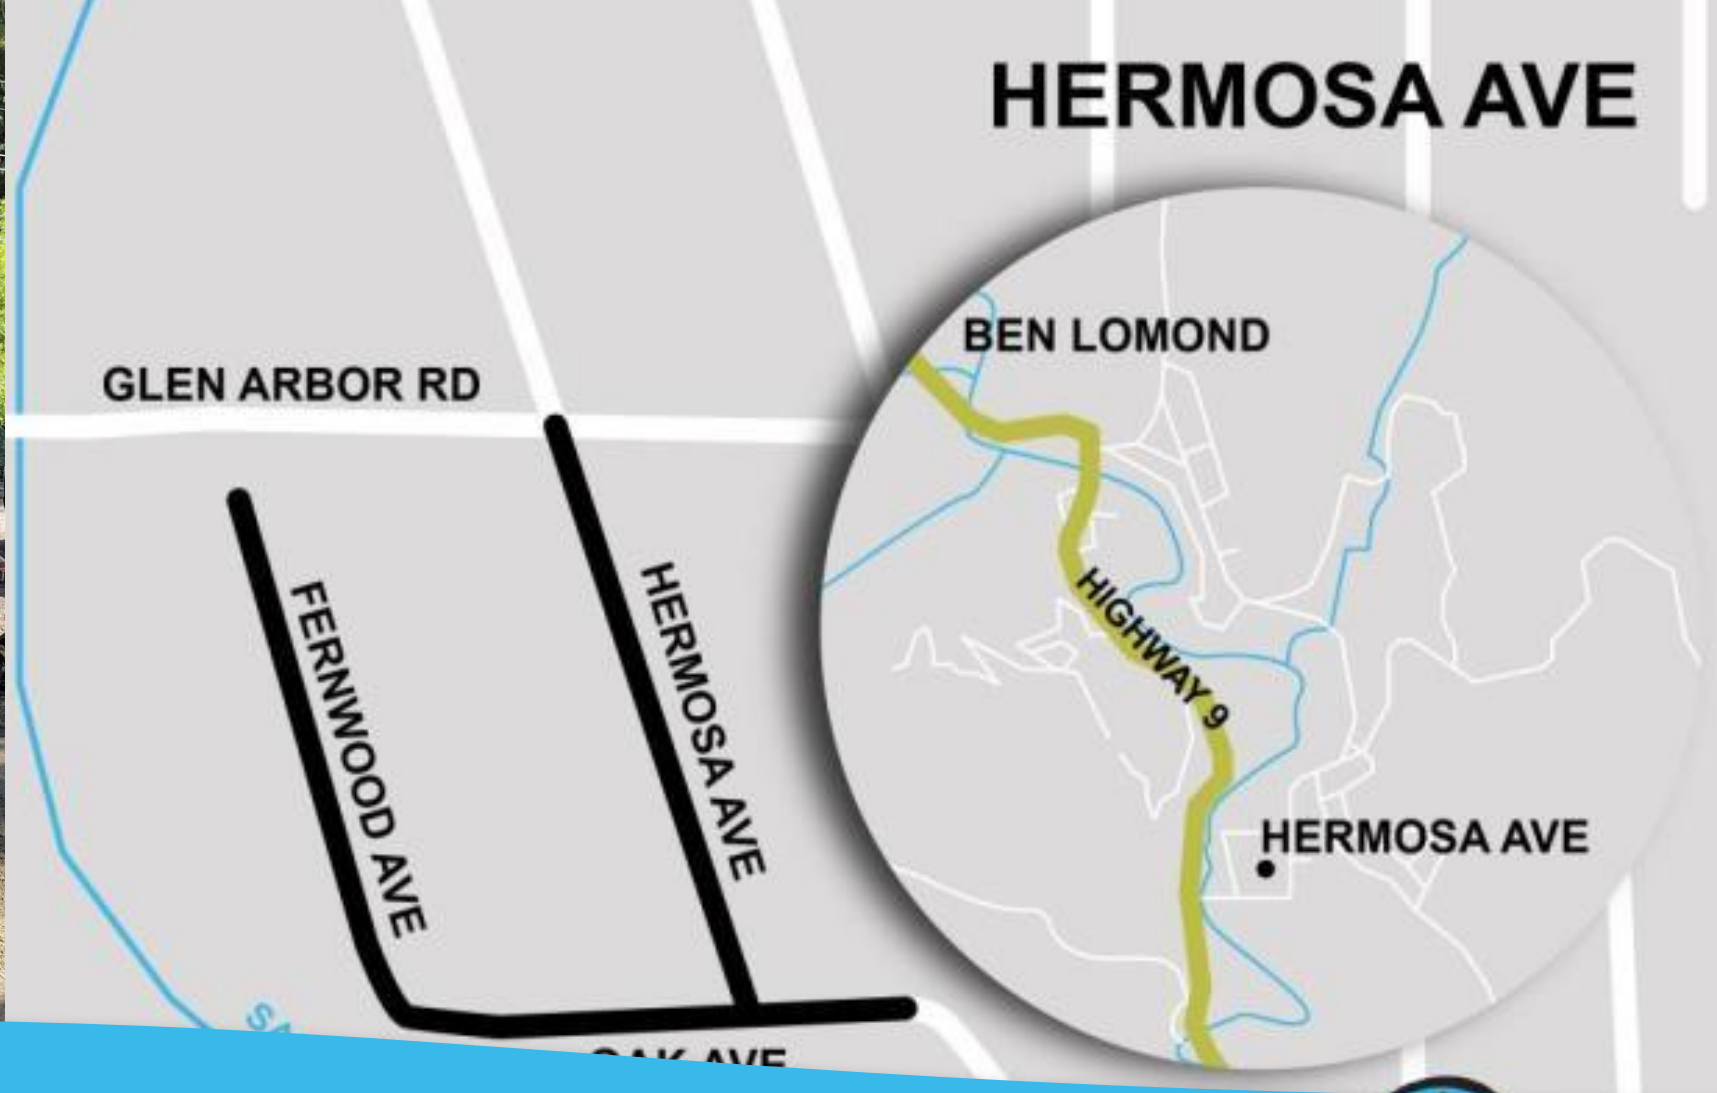

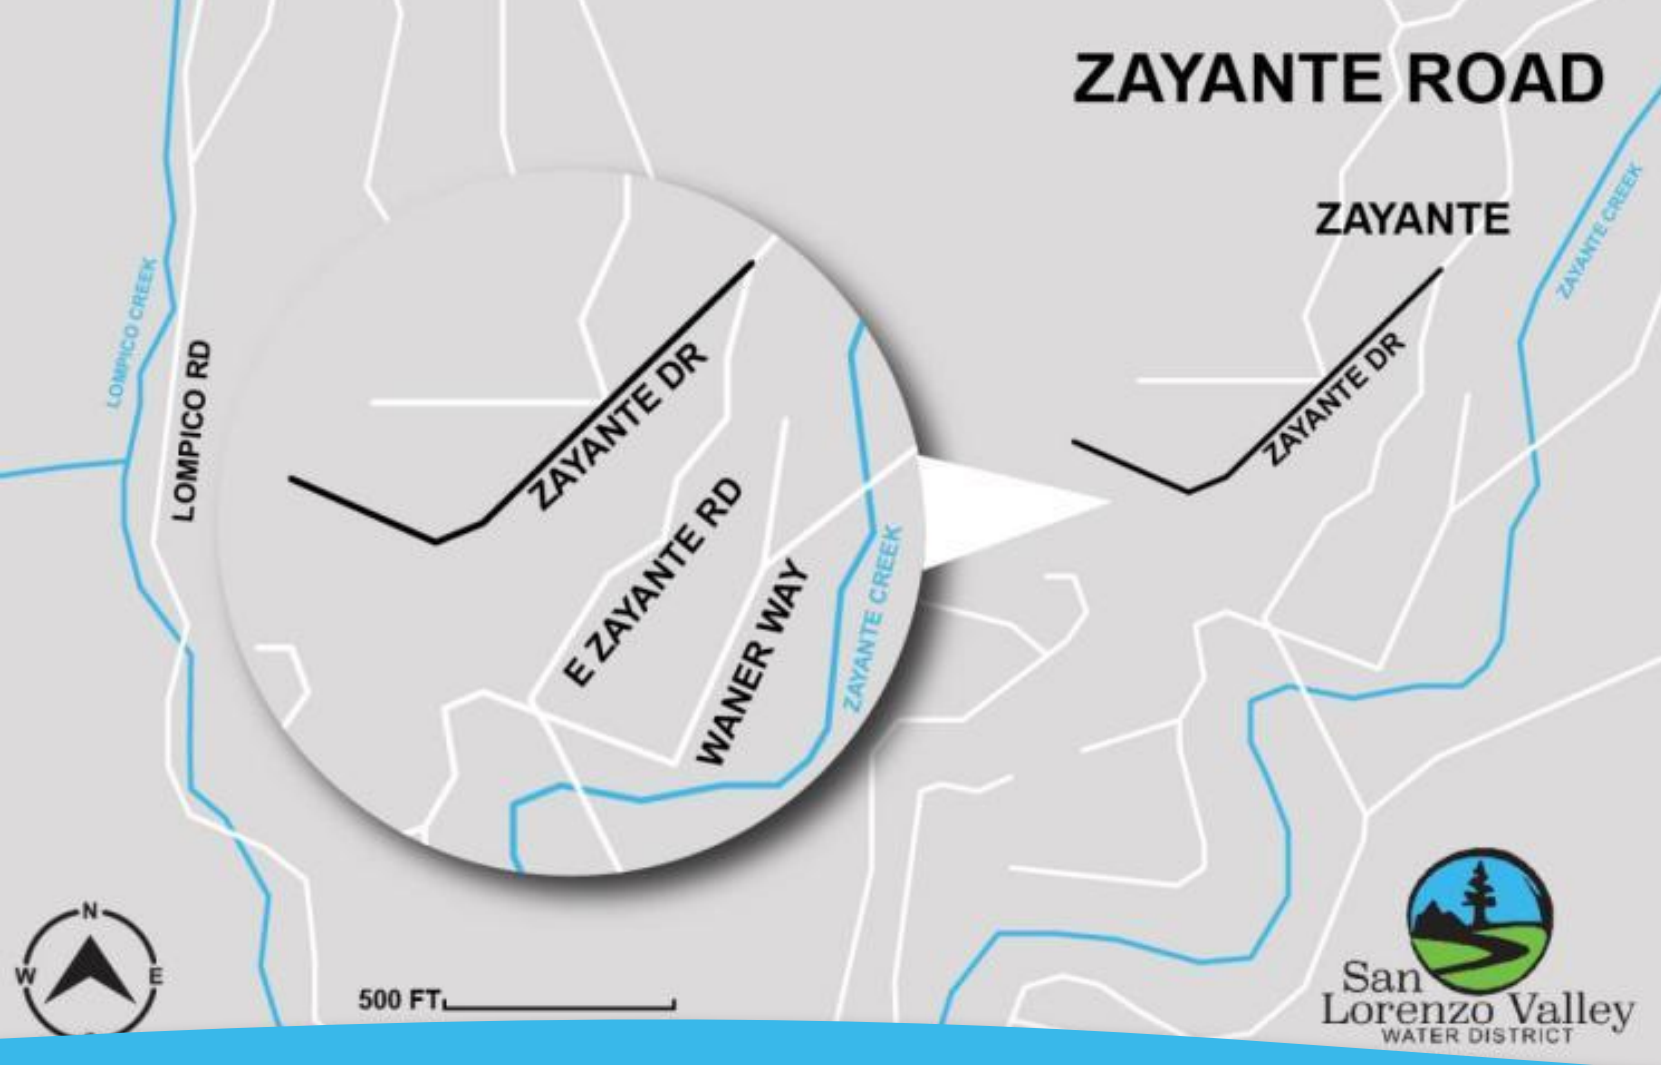

# Alta Via/Monan Way Water Main Replacement Project

# Huckleberry Island Water Main Repair Project

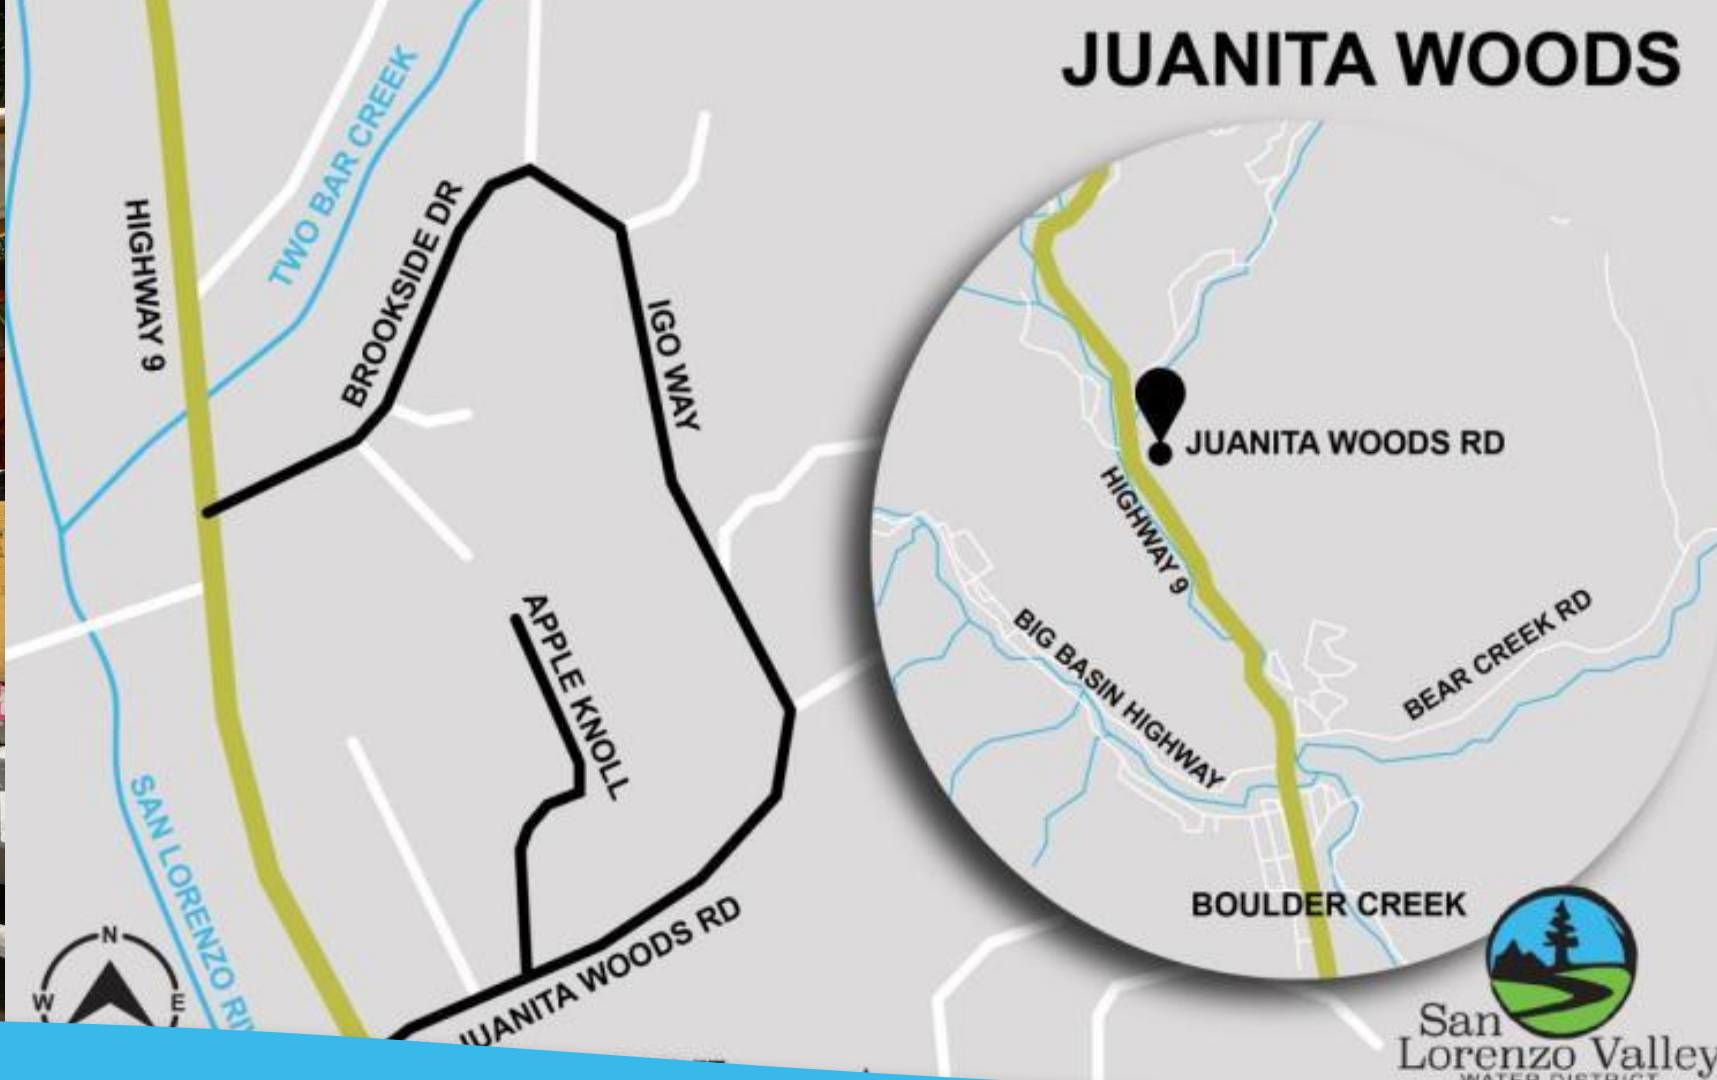

# Hermosa Avenue Mainline Replacement Project

# Zayante Drive Mainline Replacement Project

# Juanita Woods Main Replacement Project

# Fall Creek Fish Ladder Improvement Project

The Fall Creek Fish Ladder Improvement Project modified concrete structures that will improve the passage for fish, including steelhead trout, to reach their spawning grounds in upper Fall Creek.

Construction in the streambed is complete and surface infrastructure will be completed in early 2024.

# Blue Ridge Tank Replacement Project

The project replaced an undersized redwood tank for a steel tank three times the size. The upgrade increased the amount of water available for customer use and firefighting purposes.

# Lyon & Big Steel Zone Pipeline Improvement Project

The Lyon and Big Steel Zone Pipeline Improvement Project replaces 12,000 feet of undersized water main to greatly improve the flow of water for customer use and firefighting.

# Orman Road Mainline Replacement Project

# Foreman Access Trail Rehabilitation

The Foreman Access Trail Rehabilitation work is set to start this spring. The project will rehabilitate a path between the Foreman Intake site and the Lyon Water Treatment Plant.

Because of the 2023 storms and other factors, there is significant damage to the trail. Rehabilitating the path helps ensure safe and reliable access to the raw water source.

# Redwood Park Pipeline Replacement Project

# Quail Hollow Pipeline Replacement Project

# Additional SLVWD Projects

The District is working on additional Capital Improvement Projects to improve water service to customers and increase firefighting capabilities. Learn more about them by visiting [www.slvwd.com/projects](http://www.slvwd.com/projects)
